

## New BA2 taps for darts - Now from VÖLKEL!

Darts is no longer just a game of skill played in pubs; it has developed into an extremely popular sport that now fills huge halls at professional events. The precision and balance of the darts are crucial to success in the game, which is why the various components of a dart play an important role.

A dart consists of several parts: the tip, the barrel, the shaft and the flight. The most important connection point on the dart is at the end of the barrel, where the shaft is attached. There is a special thread there, the **BA 2 thread**. It is characterized by high precision and accuracy of fit, which is essential to ensure that the dart flies stably and evenly.

Now available in our range:

Our new [BA2 taps](#) are manufactured in accordance with **ISO 529** and have a **form C chamfer**. They are made from **HSSE** and **HSSE-PM**, which ensures even greater durability and resistance - perfect for the best results!

For dart players and manufacturers, a BA2 tap is essential for several reasons:

1. **Repair:** Intensive playing can cause the thread on the barrel to become worn or damaged. The thread can be replaced or recut with a BA2 tap so that the shaft is once again firmly and securely seated.
2. **Customization:** Many dart players customize their darts. Cutting their own threads allows them to use different combinations of barrels and shafts to achieve the optimum balance and trajectory.

3. **Manufacturing:** For dart manufacturers, a tap is an essential tool in the production process. It enables the precise production of the threads required to produce high quality and consistent darts.

Whether you are a professional or a hobby player, taking care of the BA2 thread is a must for optimum game play!

## HSSE & HSSE-PM

## Form C Straight fluted

The VÖLKEL [BA 2 dart taps](#) are available from stock.

Contact us today to find out more about the BA2 taps or other products in our range. Our dedicated team will be happy to answer your questions and help you find the right solution for your thread.
