

VÖLKEŁ HexTap wheel set - An indispensable tool set

Dear business partners,

we are pleased to inform you that we will be taking part in the **Rallye Dakar Classic** in January with several G-Wagons. Our "Fast Assistance" Mercedes 2636 6x6 service trucks are equipped with VÖLKEŁ and V-COIL products to ensure fast and safe repair of damaged or defective threads. This ensures that our service technicians from the **VÖLKEŁ team** always have the right tools available to keep the three G-Wagons ready for use safely and quickly during racing.

Today we would like to introduce you to another practical product that is not only used on racing vehicles:

[VÖLKEŁ HexTap wheel set item no. 48647](#)
in a solid metal case for clean and safe storage

The VÖLKEŁ HexTap wheel set has been specially developed for recutting and cleaning damaged internal and external threads of wheel studs and wheel nuts on cars and trailers. Here are some of the outstanding features that make this set an indispensable tool:

- **Versatile application options:** Simple operation with open-end wrench, ratchet or a hexagon wrench enables flexible use.
- **Practical metal case:** The robust metal case not only offers secure storage, but also a content overview in the lid for easy restocking.
- **High-quality materials:** The VÖLKEŁ hexagon die nut and the HexTap DS (double ended tap, multi-drive) are made of HSS quality steel (DMo5, M2) and manufactured to German industry standards on modern CNC machines.
- **HexTap DS:** Equipped with pilot for exact alignment and offering a rougher and a finisher in one tool.
- **Application in hard-to-reach places:** The special design and flexible drive enables application in places that are difficult to access.
- **Versatile use:** Ideal for creating new threads or recutting and repairing damaged threads.

Why is thread maintenance important?

The threads of wheel studs and nut threads are exposed to strong weather-related influences all year round. In order to maintain perfect function over a long period of time, it is recommended to recut the threads in case of slight damage or early signs of corrosion.

With the VÖLKELE HexTap wheel set, you have the perfect tool at hand to keep your threads in top condition and ensure that your vehicles are always ready for use.

Feel free to contact us for further information.

You can find more information about the **VÖLKELE team** and the **Rallye Dakar Classic** [here](#).
