

THE grease nipple set from VÖLKE

Our [grease nipple threading tool kit](#) is specifically designed for re-tapping and cleaning damaged internal threaded sockets on grease nipples. With these tools you can ensure the smooth operation of your moving components, hydraulic cylinders and construction and agricultural machinery. The grease nipple threading tool kit for grease nipples is the perfect solution for repairing damaged female threaded sockets and ensuring optimal lubrication. With this set you can improve the screwing in of the grease nipple, prevent leakage of the lubricant from the side and ensure that the lubricant reaches its intended location.

The threading tool set consists of the six most popular dimensions:

- M 6 x 1,0
- M 8 x 1,0
- M 10 x 1,0
- M 10 x 1,25
- G 1/8 x 28
- G 1/4 x 19

This allows to machine a wide range of grease nipples with different thread dimensions. The set comes in a practical plastic box, which is equipped with a foam insert. This ensures that the tools are well protected and can be easily transported.

To simplify the use of the tool set, you will find a contents overview in the lid of the box. This enables easy assignment of the tools and helps you to restock them. You always have an overview and can quickly find the right tool.

For further information on our threading tools and their application range, please do not hesitate to contact us at any time.
